### Practical Difficulty Criteria

**Please check the following criteria that apply(ies) to your variance request and provide explanation in the space below each criterion.**

	Whether special conditions and circumstances exist which are peculiar to the land or structure involved and which are not applicable generally to other lands or structures in the same Zoning District; examples of such special conditions or circumstances are: exceptional irregularity, narrowness, shallowness or steepness of the lot, or adjacency to nonconforming and inharmonious uses, structures or conditions
	Whether the property in question will yield a reasonable return or whether there can be any beneficial use of the property without the variance
	Whether the variance is substantial and is the minimum necessary to make possible the reasonable use of the land or structures
	Whether the essential character of the neighborhood would be substantially altered or whether adjoining properties would suffer substantial detriment as a result of the variance
	Whether the variance would adversely affect the delivery of governmental services such as water, sewer, trash pickup
	Whether special conditions or circumstances exist as a result of actions of the owner
	Whether the property owner's predicament feasibly can be obviated through some method other than a variance
	Whether the spirit and intent behind the zoning requirement would be observed and substantial justice done by granting a variance
	Whether the granting of the variance requested will confer on the applicant any special privilege that is denied by this regulation to other lands, structures, or buildings in the same district
