Subject: Roofing Inspections

Nick,

As you are aware, I was in a recent phone conversation with Bud Cary when he hung up on me after making a disrespectful comment. I believe this was in response to a complaint I made to the Ohio Department of Commerce Board of Building Standards regarding the roof permitting process in Stow. This investigation resulted in the Board ordering a change in the process as well as mandatory training for building officials in Stow.

I am not confident that I will be treated fairly while doing any projects in the City of Stow. I further believe that this type of treatment is in response to my complaint and will continue as retribution for the complaint as long as I am in the City.

Please be aware that I do not think this is proper behavior by a so called public servant, but is a direct personal attack and should not be tolerated.

Bonnie, please read this letter at the next meeting of City Council as a formal complaint.

Thank You
Paul Zuravel
