Subject: Comments for City Council Meeting 10/11/18

Please read the following into comments at the City Council Meeting on Thursday October 11th. Thank you.

Good evening. I appreciate the opportunity to have my voice heard even in my absence. At the last Council meeting I was excited to hear that the entertainment district plan has moved forward to advertising for proposals. Stow notably lags behind so many neighboring communities and is long overdue an upgrade.

As a resident of Ward 4 where the plan is proposed, I am invested in being involved in this project and I was disappointed to hear my Councilman, Mr. Adaska, vote against moving forward. I have been active in discussion with members of the community in person and via social media and although opinions vary widely, I have encountered very few people who believe that simply doing nothing is the best course of action.

Therefore, I want to take this opportunity to go on the record as a resident of Ward 4 who is in favor of moving forward with this project. I look forward to following this very closely.

Thank you for your time and attention.
